GlobalMedia™
Innovative Telemedicine

Send **crystal clear heart sounds** anywhere

Easy to use

With the ultra-low bandwidth requirement, the CareTone™ stethoscope will send you crystal clear heart, airway and lung sounds. It is recognized internationally as the industry leading, real-time, digital electronic stethoscope.

Consistency & reliability

The CareTone™ solution provides you with enhanced audio filtering, featuring true-to-life sound delivery, full range sensitivity and a 99.9% reliability record over the last 16 years.

Multiple communication paths

Use it with your current equipment, whether you have a video conferencing system, a PC based system or even assign your stethoscope its own IP address using the CareTone™ IP Management System, (CIMS).

CareTone™

Telephonic stethoscope

- **Low bandwidth requirements**
- **ISO, FDA and Health Canada licenses**
- **International patents**
- **Works in mixed environments**
