PLUG & PLAY

Instant Intraoral Camera - MIHARU

MIHARU
HOME CARE CAMERA

Instant Intraoral Camera

MIHARU is an easy yet effective intraoral camera. Simply plug into the video input jack of any display device and you can view the intraoral condition immediately on the video display.

One Touch Mode Changer

The camera mode can be easily switched with pressing the button.

The remarkable Plaque Detector Mode helps yours patients to visualize dental plaque and tartar, which is illuminated in pink color. It helps to educate your patients on proper

brushing technique and importance of periodic dental cleaning.

Magnified Perspective (Option)

By attaching the Macro Lens Cap to MIHARU, it is instantly changed to a magnifying glass. Sixty-five times magnification* enables you to see the detailed parts that you were not able to see with your naked eyes. Magnify and enjoy to check your health condition such as scalp, skin or for any other observation that you want to see.
*Upon 25" size monitor
