Disclaimer

- Make, models and manufacturers of products are discussed.
- Some models are discussed as examples and not meant to be promotional marketing or advertisement for the product.
- Reviews are based on our specific experience, device and encounter and may not be generalizable.
- We do not endorse any particular product.
- Reviews are not meant to identify one particular device for purchase nor to direct clinical care.

Mobile Blood Pressure Monitors

Our Criteria

- Consumer based products
- Able to Travel (backpack, suitcase, etc.)
- Automatic inflation & measure
- No major software purchase required
- Under \$300

Does Not Include

- Home health or remote monitoring devices with hubs
- Monitoring devices that are part of broader inclusive package
- Ambulatory Blood Pressure Devices
- Anything over \$300 (consumer cost break)

Not Included

-Home Health Monitoring Devices with Hub-

All IDEAL LIFE Managers™ - our patented, FDA-approved monitoring devices - communicate through a wireless gateway known as the IDEAL LIFE Pod™. Users simply plug the Pod into a regular telephone jack and their home is instantly ready for integrated, automatic communication with any of IDEAL LIFE's remote health management products.

Not Included

-Home Health Monitoring Devices with Hub-

The BP Manager - used in conjunction with the IDEAL LIFE Pod™, a wireless gateway - transmits real-time information through any mode of communication, including phone lines, cell phones, and the Internet. Simply plug the Pod into a phone line and the system set-up is complete.

Not Included

-Units Part of a Broader Package-

A team at IBM Zurich Research Laboratory Zurich has created the IBM mobile health toolkit for gathering measurement data from a range of devices, and present it to management software via a well-defined and easily implemented interface. January 2005

http://www.ercim.eu/publication/Ercim_News/enw60/husemann.html

Not Included -Ambulatory BP Monitors-

**A&D LifeSource TM-2430
@ \$1,800**

**WA Amb BP Recorder 6100
@ \$1,900**

Tiba or Mortura Medical

Mobile Blood Pressure Monitors

Our Criteria

- Consumer based products
- Able to Travel (backpack, suitcase, etc.)
- Automatic inflation & measure
- No major software purchase required
- Under \$300

Mobile BP Pressure Devices

Our Definition

I would like a reasonably priced BP unit that I can travel with and download my data.

iHealth™
BLOOD PRESSURE DOCK
QUICK START GUIDE

1. CONNECT YOUR IOS DEVICE, GET THE Health APP FROM THE APP STORE

Connect the blood pressure dock with your iPod touch, iPhone, or iPad. Download the "iHealth" App from the App Store.

2. CONNECT THE DOCK TO THE DOCK

Place the cuff fully inflated into the dock and turn on the dock. Make sure the connector is fully inserted in the dock and the cuff is fully inflated in the dock.

3. PREPARE FOR MEASUREMENT

Place the cuff around your bare arm. Inflate the cuff until you feel a slight pressure. When you feel a slight pressure, you will see a bar on the screen with a mark on it.

BLOOD PRESSURE DOCK
QUICK START GUIDE

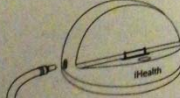

1. CONNECT YOUR iOS DEVICE, GET THE iHealth APPLICATION FROM THE APP STORE

Connect the blood pressure dock with your iPod touch, iPhone, or iPad.
Download the free "iHealth" App from the App Store.

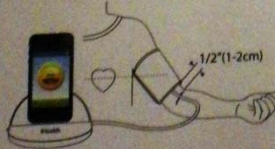

2. CONNECT THE CUFF TO THE DOCK

Insert the cuff tubing connector into the air port on the left side of the dock. Make sure the connector is fully inserted to avoid air leakage during the blood pressure test.

3. PREPARE FOR MEASUREMENT

Place the cuff around your bare arm 1/2" (1-2cm) above the elbow joint.
When seated, place your arm on a flat surface such as a desk or

Mobile Blood Pressure Devices -Comments-

| iHealth BP 3 | Withings BP-800 | Omron BP791IT | Omron HEM-670IT (wrist) |
|--|---|--------------------------------------|--|
| A little hard to put on & position cuff | Easy to slide on & can grab cylinder to position | Typical BP easy to put on & position | Easy simple to put on |
| Takes P during up Cycle | Inflates above max Systolic | Inflates above max Systolic | Most positional |
| Soft cuff | Nice twirling fan graphic | Most conventional unit | Small letters & numbers |
| Takes longer to do the reading, but don't really notice because of the graphic | So tight that in can hurt a little with inflation | | Used battery power faster than other units |

New! On the horizon...

iHealth wrist and Bluetooth

iHealth Lab, a subsidiary of China-based Andon Health, just received 510(k) clearance from the FDA for a wrist-worn, Bluetooth-enabled blood pressure monitor called the iHealth BP7 Wireless Blood Pressure Wrist Monitor that will connect with iPhones, iPads, and iPod touch devices. July, 2012

<http://mobihealthnews.com/17838/ihealth-to-launch-bluetooth-wrist-worn-blood-pressure-monitor-next/>

New! On the horizon...

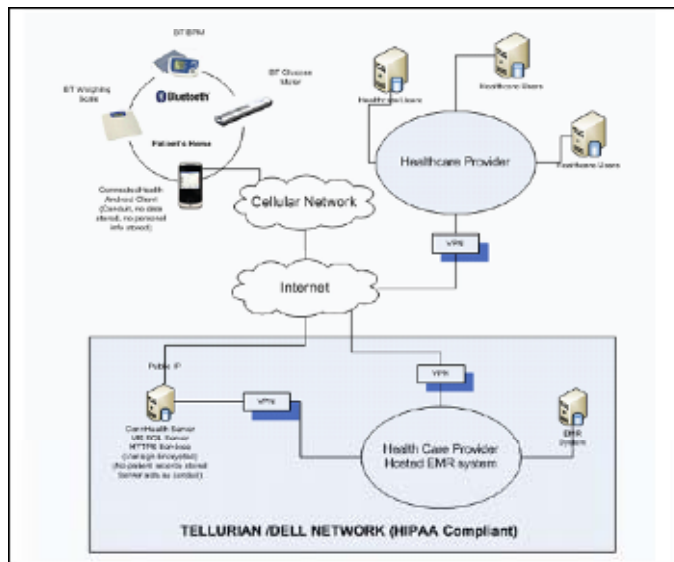

Android

Blood Pressure Monitors planning to integrate with Android application as well.

Android HMA (Health Manager Application “HMA”)

The Android HMA is an application developed by ConnectedHealth which will be pre-installed on the Android Phone. The role of the HMA is to act as a gateway routing data from medical devices in the patient’s home to a central Electronic Medical Record housed at a secure site, and accessible by the Managed Healthcare organization.

<http://www.wirelessdesignmag.com/ShowPR.aspx?PUBCODE=055&ACCT=0000100&ISSUE=1108&RELTYPE=PR&PRODCODE=000000&PRODLTT=GP&CommonCount=0>

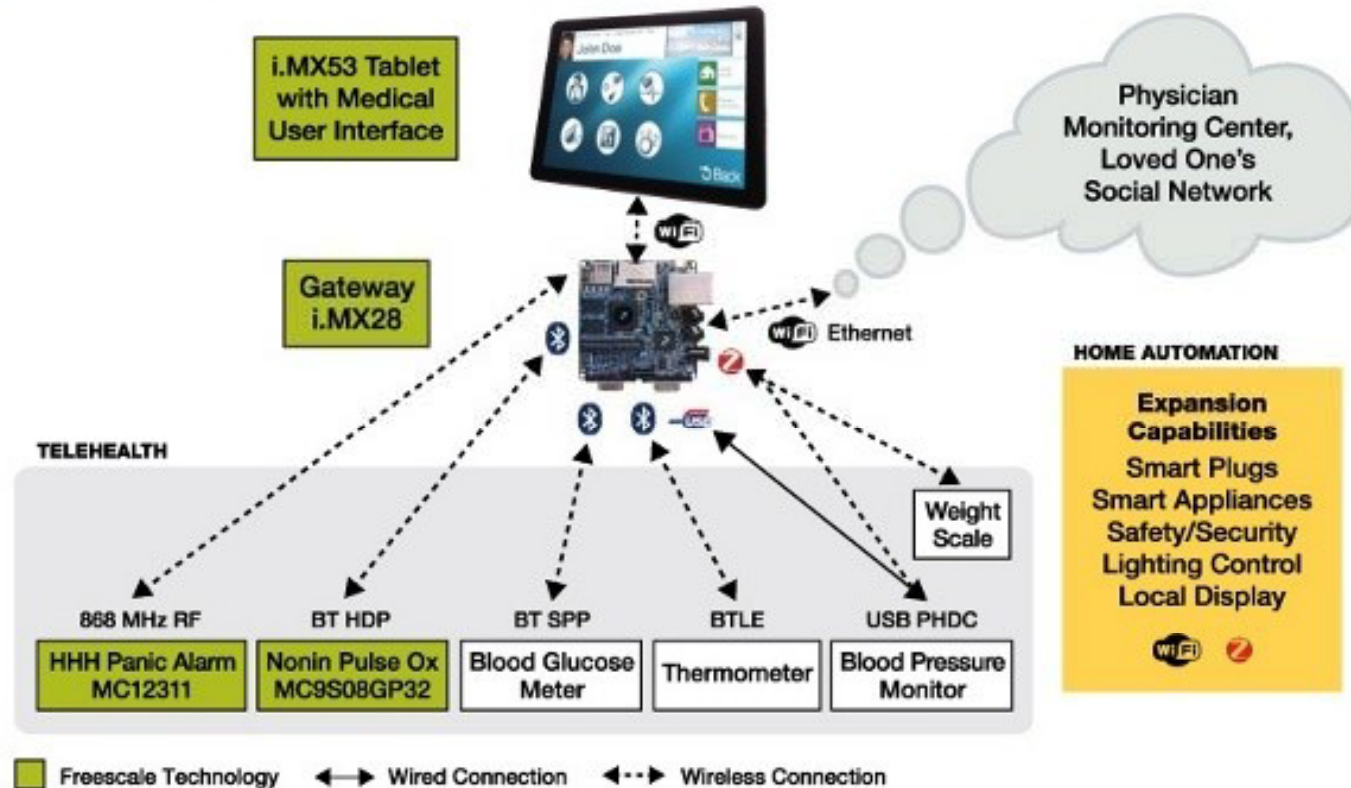

New! On the horizon...

Home Hub (Freescale)

Freescale is working on a connected platform called Home Health Hub (HHH), an i.MX28-based reference platform for others to build on. The ARM9 processor is connected to a host of networking interfaces, including WiFi, Bluetooth (as well as its low-power implementation), Zigbee, sub-1GHz and Ethernet. The Hub will be a central point for connecting various medical devices like blood pressure monitors or glucometers that then feeds data to a tablet.

<http://www.engadget.com/2011/11/19/freescale-home-health-hub-wants-to-usher-in-the-era-of-connected/>

Home Health Hub Reference Platform Demonstration

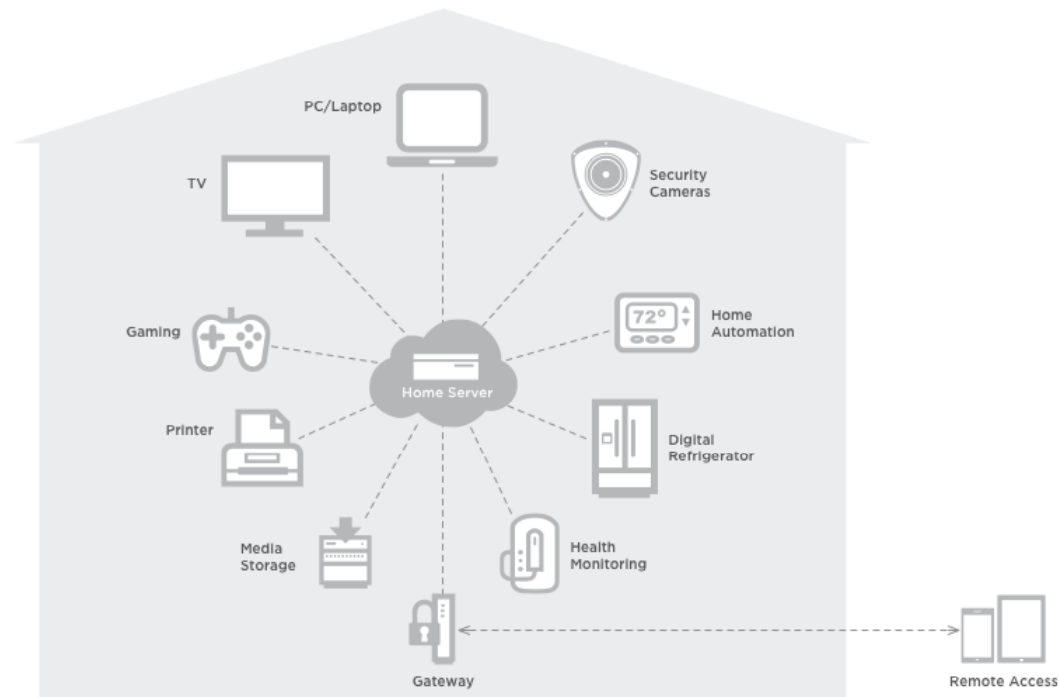

New! On the horizon...

Home Cloud Services (Marvel)

Marvell's Home Server initiative solves this problem by enabling an affordable, low power platform with plug and play installation which connects home digital devices seamlessly and provides easy remote access.

Marvell's total bundle solution – highly integrated SoCs, advanced 802.11n, WI-Fi, G.hn solution, Phy, power management, and switch – make it simple for OEMs to quickly design a system, resulting in faster time to market and reduced development cost

**Health
Monitoring
&
Remote
Access**

New! On the horizon...

**With Home Hubs / Home Cloud Services
will BP Monitor devices become just
another consumer integrated device?**

New! On the horizon...

Cuffless Wireless BP Monitoring?

Sense A/S (Taastrup, Denmark) is developing a continuous blood pressure monitor using a patch that has electrodes that sense the changing impedance of tissue around a vessel and convert it into a BP reading. They received \$5.9 million from venture fund SEED Capital & Vaekstfonden to help refine this cuffless BP measurement device. Feb. 2012

<http://medgadget.com/2012/02/new-startup-develops-continuous-blood-pressure-measurement-without-a-counter-pressure-cuff.html>

New! On the horizon...

Cuffless Wireless BP Monitoring?

Sense A/S (Taastrup, Denmark) expects to secure FDA 510(K) clearance for the blood pressure measurement device and have it launched commercially next year, 2013.

<http://medgadget.com/2012/02/new-startup-develops-continuous-blood-pressure-measurement-without-a-counter-pressure-cuff.html>
