

A large space shuttle is positioned on the launch pad at night, illuminated by bright lights. The shuttle is silhouetted against the dark sky, with a bright light source behind it creating a lens flare effect. The launch pad is also lit up, and the surrounding area is dark.

# Interoperability of Health Information

## AGENDA

### BACKGROUND

### CURRENT ENVIRONMENT

### WHAT IS MEANS TO YOU

*Background*

## **Perspective**

Why does a store and forward telehealth solution from Alaska care about interoperability?

## **Communication**

Be able to understand each other when talking about health information exchange

## **Content**

Make sure we are collecting and sharing the “right” kind of data

## **Reuse**

Make our software work with as many other products as possible

*Background*

## Sharing Health Information

Isolated systems can  
not stay isolated

Sharing health information is a key piece to success

*Background*

## What to standardize

**Content**

*How the data is packaged*

**Vocabulary**

*How we identify the data*

**Privacy and security**

**Transport**

*How to move the data*

*Background*

## What to standardize

# Content

*(How the data is packaged)*

Example:

HL7 CDA

Continuity of Care  
Document (CCD)

HL7: Health Level Seven

CDA: Clinical Document Architecture

# What to standardize

## Sample CCD in human readable format

The screenshot shows a Windows Internet Explorer browser window displaying a Continuity of Care Document (CCD) for Henry Levin. The browser's address bar shows the file path: C:\Users\nhogge\Desktop\CCD for CDA F. The document title is "Good Health Clinic Continuity of Care Document". The document was created on April 7, 2000. The patient information is as follows:

<b>Patient:</b>	Henry Levin , the 7th	<b>MRN:</b>	996-756-495
<b>Birthdate:</b>	September 24, 1932	<b>Sex:</b>	Male
<b>Guardian:</b>	Kenneth Ross 17 Daws Rd. Blue Bell, MA, 02368 tel:(888)555-1212	<b>Next of Kin:</b>	Henrietta Levin tel:(999)555-1212

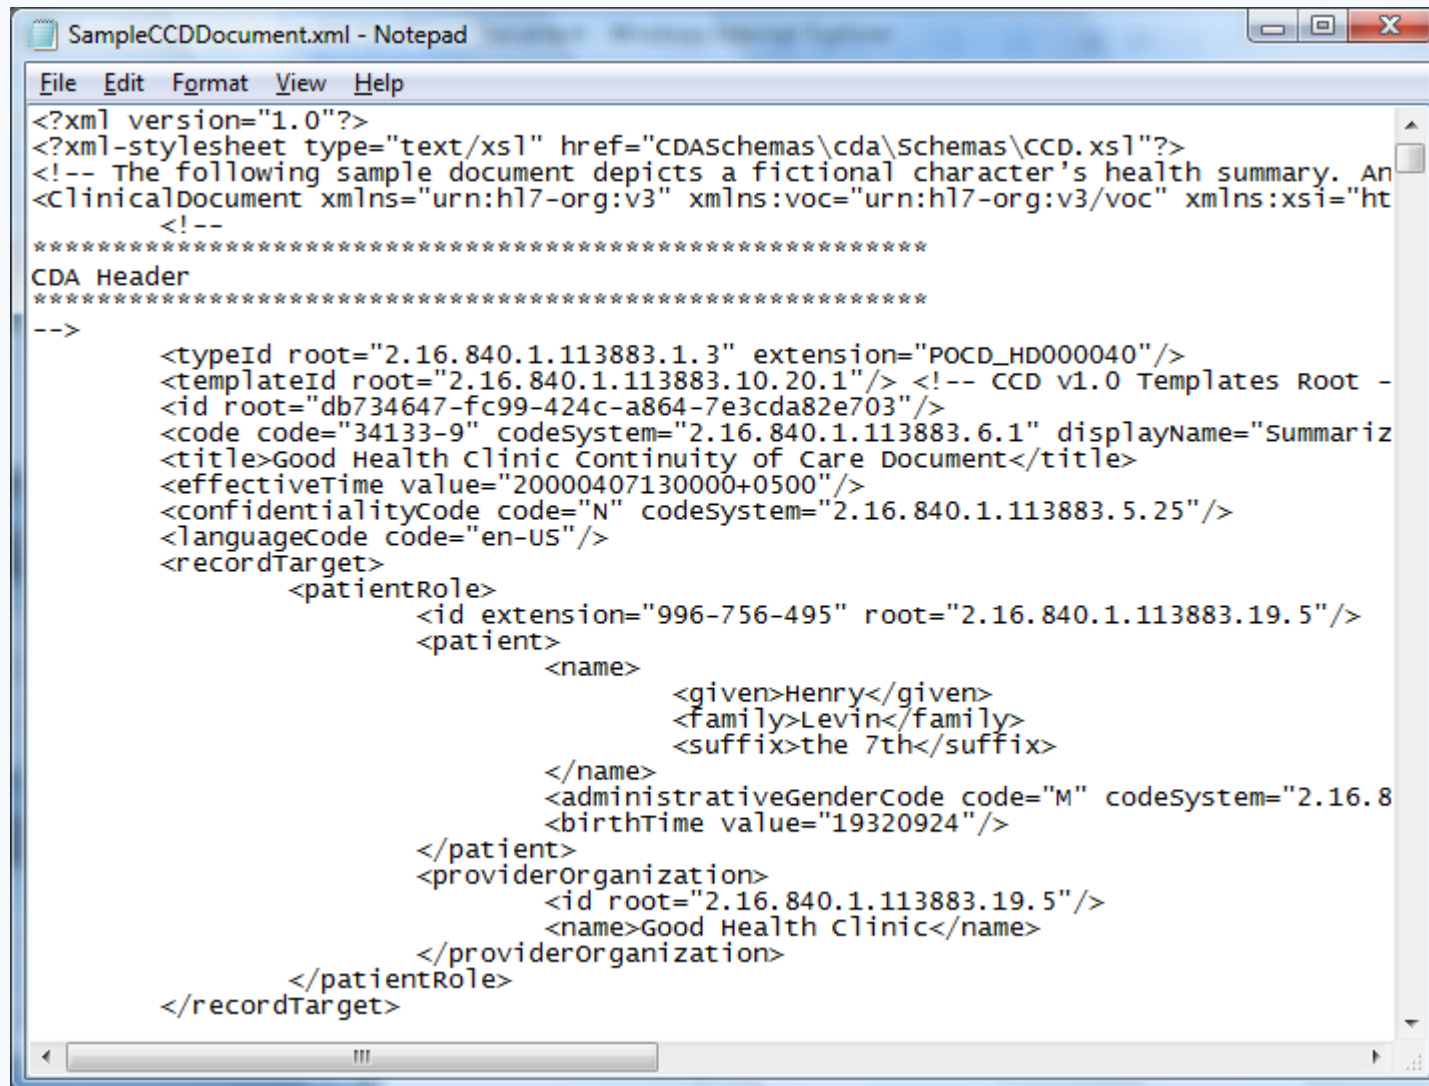

Below the patient information is a "Table of Contents" section with the following links:

- [Summary Purpose](#)
- [Payers](#)
- [Advance Directives](#)
- [Functional Status](#)

The browser's status bar at the bottom shows "Done", "Internet | Protected Mode: On", and a zoom level of "100%".

*Background*

## What to standardize

# Vocabulary

*(How we identify the data)*

Example:

ICD-9-CM

ICD: International Statistical Classification of  
Diseases and Related Health Problems

# What to standardize

## Listing of ICD-9-CM codes from Wikipedia

**ICD-9-CM Volume 3**  
From Wikipedia, the free encyclopedia

ICD-9-CM Volume 3 is a system of procedural codes. It is a subset of ICD-9-CM (volumes 1 and 2 are used for diagnostic codes.)

**Contents** [hide]

- 1 Main sections
- 2 (00) Procedures and interventions, not elsewhere classified
- 3 (01–05) Operations on the nervous system
- 4 (06–07) Operations on the endocrine system
- 5 (08–16) Operations on the eye
- 6 (18–20) Operations on the ear
- 7 (21–29) Operations on the nose, mouth and pharynx
- 8 (30–34) Operations on the respiratory system
- 9 (35–39) Operations on the cardiovascular system
  - 9.1 Heart
  - 9.2 Vessels
- 10 (40–41) Operations on the hemic and lymphatic system
- 11 (42–54) Operations on the digestive system
- 12 (55–59) Operations on the urinary system
- 13 (60–64) Operations on the male genital organs
- 14 (65–71) Operations on the female genital organs
- 15 (72–75) Obstetrical procedures
- 16 (76–84) Operations on the musculoskeletal system
- 17 (85–86) Operations on the integumentary system
- 18 (87–99) Miscellaneous diagnostic and therapeutic procedures
  - 18.1 Diagnostic radiology
  - 18.2 Interview, evaluation, consultation, and examination
  - 18.3 Nuclear medicine
  - 18.4 Physical therapy, respiratory therapy, rehabilitation, and related procedures
  - 18.5 Procedures related to the psyche
  - 18.6 Ophthalmologic and otologic diagnosis and treatment
  - 18.7 Nonoperative intubation and irrigation
  - 18.8 Replacement and removal of therapeutic appliances/nonoperative removal of foreign body or calculus
  - 18.9 Other nonoperative procedures
- 19 External links

**93.52 Application of neck support**

*Background*

## What to standardize

# Privacy and security

Example:

FIPS pub 197 - AES

FIPS: Federal Information Processing Standards

AES: Advanced Encryption Standard

# What to standardize

## Security information for secure web site

The screenshot shows a web browser window with the address bar displaying "United Services Automobile Association [US] https;". A security information panel is open, providing details about the website's security. An orange arrow points to the encryption details section.

**United Services Automobile Association (...**  
The identity of United Services Automobile Association at San Antonio, Texas US has been verified by VeriSign Class 3 Extended Validation SSL CA.  
[Certificate information](#)

---

**Your connection to www.usaa.com is encrypted with 256-bit encryption.**

The connection uses TLS 1.0.

The connection is encrypted using AES\_256\_CBC, with SHA1 for message authentication and RSA as the key exchange mechanism.

The connection is not compressed.

*Background*

## **What to standardize**

**Transport**

**Under debate...**

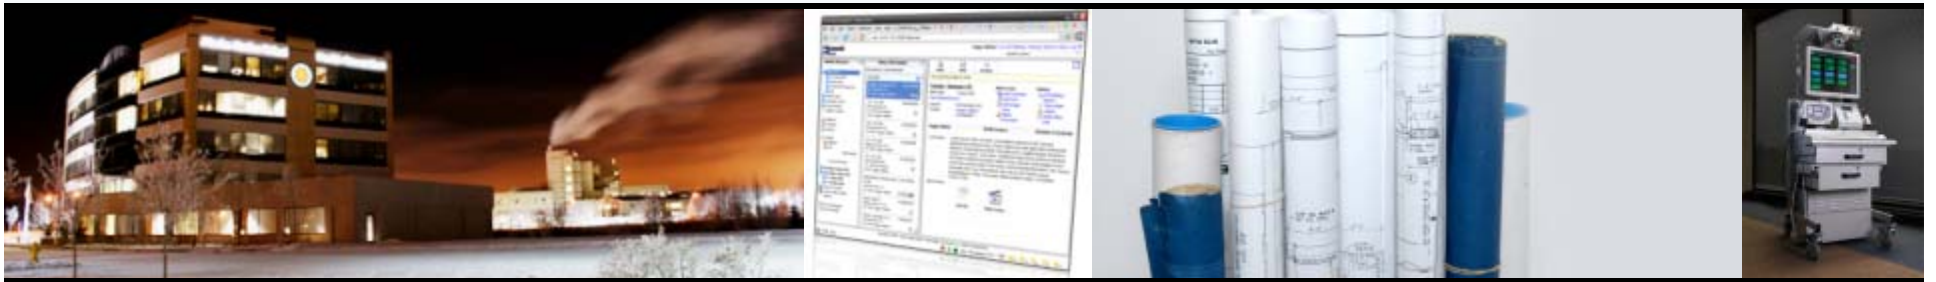

*Background*

# **Moving Target**

## **Standards are not perfect**

As we learn more things change

# CURRENT ENVIRONMENT

## The Players

Federal Government

**ONC:** Office of the National Coordinator  
for Health Information Technology  
**CMS:** Centers for Medicare & Medicaid Services

State Government

Health Information Exchange (HIE)

Vendors

Participate in pilot programs, certifications

Providers

Adjust to new requirements

Standards Development  
Organizations

Harmonization of existing standards

# MEANINGFUL USE

American Recovery and Reinvestment Act of 2009 (ARRA)

contains

Health Information Technology for Economic and Clinical Health Act (HITECH act)

*established programs under Medicare and Medicaid to  
provide incentive payments for the*

**meaningful use**

*of certified electronic health records (EHR) technology.*

Certification Programs

Standards and Certification Criteria

Privacy and Security

# MEANINGFUL USE

## Certification Programs

*“Defines Meaningful Use”*

A defined **process** to ensure that EHR technologies meet the adopted standards, certification criteria, and other technical requirements to achieve meaningful use of those records in systems.

Sample from document

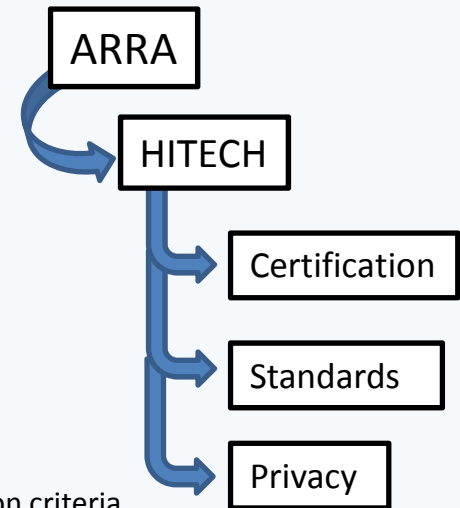

Health outcomes policy priority	Care goals	Stage 1 objectives		Stage 1 measures
		Eligible professionals	Hospitals	
Engage patients and families in their health care.	Provide patients and families with timely access to data, knowledge, and tools to make informed decisions and to manage their health.	Provide patients with an electronic copy of their health information (including diagnostic test results, problem list, medication lists, allergies), upon request.	Provide patients with an electronic copy of their health information (including diagnostic test results, problem list, medication lists, allergies, discharge summary, procedures), upon request.	At least 80% of all patients who request an electronic copy of their health information are provided it within 48 hours.

# MEANINGFUL USE

## Standards and Certification Criteria

*“Defines how to implement”*

First step in an incremental approach to adopting **standards**, implementation specifications, and certification criteria to enhance the interoperability, functionality, utility, and security of health IT and to support its meaningful use.

Sample from document

Row No.	Purpose	Category	Adopted standard(s) to support meaningful use stage 1	Candidate standard(s) to support meaningful use stage 2
1 .....	Patient Summary Record .....	Cx .....	HL7 CDA R2 CCD Level 2 or ASTM CCR.	Alternatives expected to be narrowed based on HIT Standards Committee recommendations.

# MEANINGFUL USE

## Privacy and Security

*“Defines how to enforce”*

The purpose of these modifications is to implement recent statutory amendments under the Health Information Technology for Economic and Clinical Health Act (“the HITECH Act”), to strengthen the privacy and security protection of health information, and to improve the workability and effectiveness of these HIPAA Rules.

*Sample from document*

41. In § 164.502, revise paragraphs (a), (b)(1), (e), and (f) to read as follows:

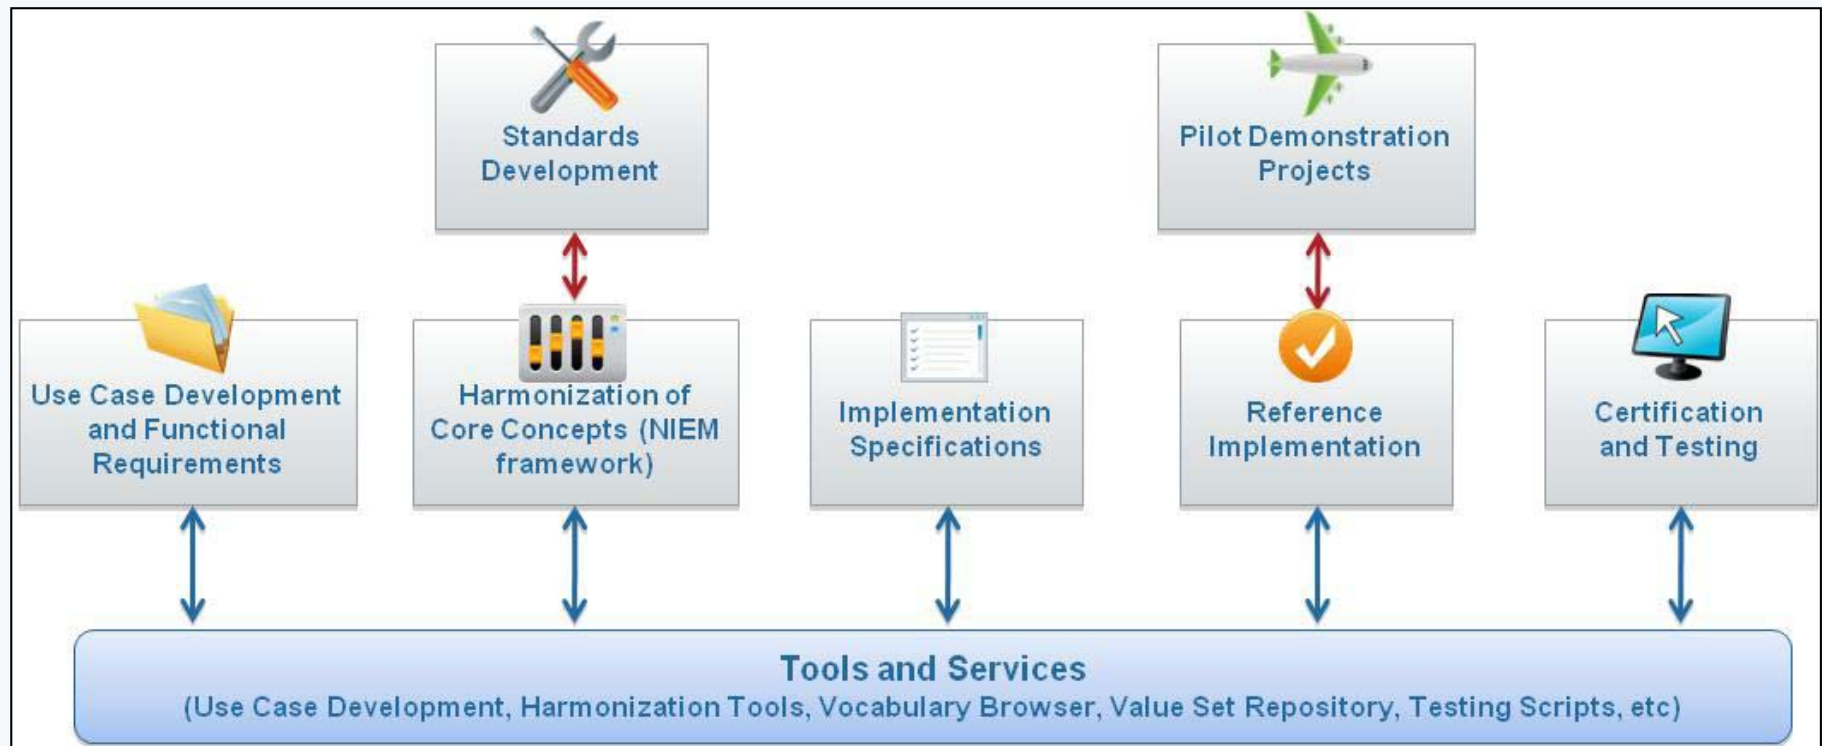

**§ 164.502 Uses and disclosures of protected health information: General rules.**

(a) *Standard.* A covered entity or business associate may not use or disclose protected health information, except as permitted or required by this subpart or by subpart C of part 160 of this subchapter.

(1) *Covered entities: Permitted uses and disclosures.* A covered entity is permitted to use or disclose protected

# Latest ONC Initiative

## Standards and Interoperability (S&I) Framework

## Existing Projects

### Nationwide Health Information Network (NWHIN)

Formally NHIN

### “NWHIN Exchange”

Robust Exchange: push or pull, subscriptions, consent, reporting

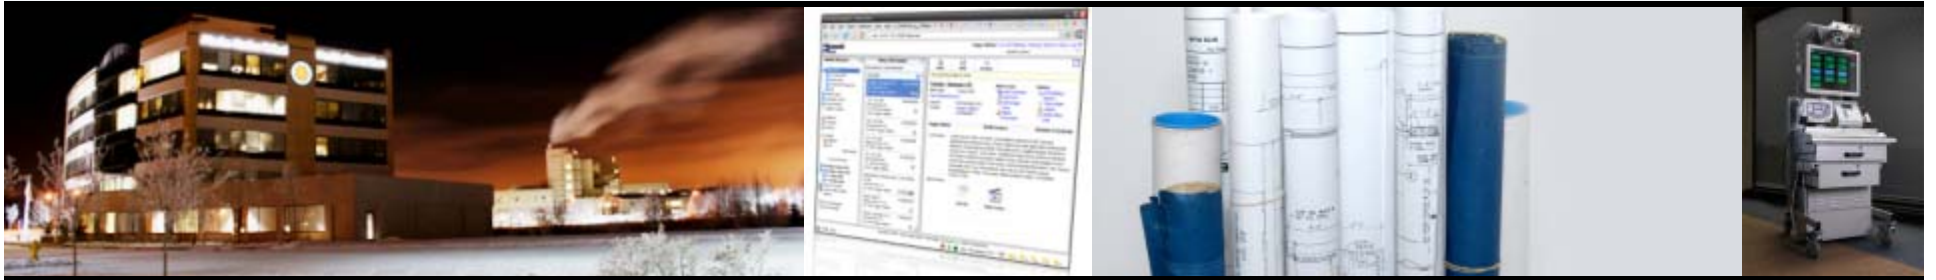

### “The Direct Project”

**NWHIN CONNECT:**

Open source implementation of a gateway to help you connect to the NWHIN Exchange

# WHAT IT MEANS TO YOU

*What it means to you*

## **Know what you are working with**

- Don't be afraid to ask
- Ask about interoperability
- Avoid one off implementations
- Verify collecting good health information content
- Keep an eye on certifications
- (Try to) Stay up to date with latest movement

# Thank You
